### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 13 February 2008.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by JP (H10-140,468).

Regarding claim 1, JP (H10-140,468) teaches a method for cutting a texture 1 employing a conveyor belt 6 conveying the texture 1 and a cutter 48 for cutting the texture comprising the steps of running a synchronizing member 49 between the texture 1 and the conveyor belt 6 synchronized with a horizontal movement of the cutter 21, and cutting the texture which is not in contact with the conveyor belt by using the cutter. See Figs. 2, 3 and 8.

Regarding claims 11 and 12, JP (H10-140,468) teaches a method for cutting a texture, comprising the steps of:

running a conveyor belt 6 to convey a texture 1 along the conveyor belt;

horizontally moving a cutter 48 positioned above the conveyor belt to provide a horizontal movement of the cutter;

running a synchronizing member 49 between the texture and the conveyor belt, the running of the synchronizing member being synchronized with the horizontal movement of the cutter; and

cutting the texture with the cutter with the texture not in contact with the conveyor belt.

See Figs. 2, 3 and 8.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP (H10-140,468) in view of Scholl (3,893,238).

JP (H10-140,468) teaches the invention substantially as claimed except for a concave portion formed on the top surface of the synchronizing member.

Scholl teaches a synchronizing member (20 & 21) having concave portion 21 formed on the top surface of the synchronizing member for cutting heavy workpiece. See Figs. 1 and 2.

Therefore, it would have been obvious to one skilled in the art at the time the invention was made to incorporate the synchronizing member having concave portion to the cutting device of JP (H10-140,468) for cutting heavy workpiece.

### ***Response to Arguments***

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
